Professional Summary

I am a motivated Backend Developer and Computer Engineering student at the University of Benin (Class of 2026) with a passion for building inclusive technology. As a Women Techsters Fellow, I specialize in developing server-side applications and APIs while actively advocating for gender equity in STEM. I am also the Founder of **Unimap+**, a campus food delivery platform featuring an inbuilt navigation map to help new students and visitors find their way around campus, currently expanding to IUO and Wellspring University. Beyond coding, I am committed to mentorship, frequently speaking at sessions to inspire other students in their tech journeys.

Technical Skills

Languages: Python, JavaScript
Frameworks: Django, Node.js, Express.js
Databases: PostgreSQL, MySQL
Tools & DevOps: Git, Docker, Kubernetes
Backend Dev: RESTful API Design, Third-Party API Integration

Education

University of Benin (UNIBEN)
B.Eng. Computer Engineering | Expected 2026
Coursework: Software Engineering, Digital Logic, Algorithms, Data Communications.

Uniben Demonstration Secondary School (UDSS)
West African Senior School Certificate (WASSCE)

Experience

Software Developer Intern – Edo State ICTA
June 2025 – October 2025

Achievements & Recognition

- **Guest Speaker** – ACES UNIBEN Webinar (2025): Spoke on finding the right internship opportunities, sharing personal experience on building skills and a portfolio while interning
- **Top 10 Finalist** – UNIBEN DRID Conference Hackathon: Applied backend development skills to build a functional solution under time constraints.
- **Women Techsters Fellow** – Selected from thousands of applicants across Africa for the Tech4Dev backend development fellowship (2025)

Certifications

Digital for All Challenge –2nd Runner-up (State Level), Tech4Dev (2025)

Technical Projects

Unimap+ – Campus Food Delivery Platform *(Founder & Backend Developer)*
Technologies: Python, Django, MySQL, RESTful APIs, Google Maps API

- Founded and built a campus-focused food delivery ecosystem connecting students and staff to school eateries at UNIBEN
- Designed backend architecture for order processing, vendor management, and user authentication
- Integrated an inbuilt campus navigation map to help new students and visitors navigate campus
- Expanding to IUO and Wellspring University — launch set for next semester

Santrack – Sanitation Tracking App *(Backend Team Lead)*
Technologies: Node.js, MySQL, RESTful APIs

- Led backend team in designing and building a sanitation monitoring system for government and citizen use across Nigeria
- Designed and implemented **20+ REST APIs** supporting report submission, case assignment, user authentication, and real-time status tracking.
- Designed relational database schemas for sanitation records and case management workflows

ProjLink – Final Year Project Management System *(Personal Project)*
Technologies: Python, Django, PostgreSQL, HTML, Bootstrap CSS, JavaScript

- Designed and built a web-based platform to streamline final year project submission and supervision
- Developed backend APIs for project submission, supervisor allocation, and progress tracking
- Implemented relational database design to manage project records and supervision workflows
- Built scalable architecture designed for faculty-wide deployment

Weather-Based Transport Ticket Pricing System *(Backend Project)*
Technologies: Node.js, MySQL, Weather API, Google Distance Matrix API

- Built a backend service that dynamically prices transport tickets using live weather and distance data
- Integrated third-party APIs to fetch real-time weather and route information
- Designed relational database schemas for ticketing and dynamic pricing records

Fellowship & Leadership

Women Techsters Fellow (Class of 2026) | Tech4Dev
2025 – Present
Intensive backend development fellowship empowering African women in technology.

Tech Advocacy Drive | Tech4Dev × UDSS
March 2026
Delivered career talks, ICT/STEM awareness sessions and mentorship links at UDSS to inspire girls to pursue technology.

Vice President | ACES (Association of Computer Engineering Students), UNIBEN
2023 – 2024

- Oversaw student initiatives and fostered a collaborative technical community
- Organized a school-wide Mental Health Outreach event across multiple faculties
- Led a team to build a custom Mental Health Assessment App integrating tech into social advocacy

Student Tech Speaker | Online Platforms
Facilitate virtual sessions to mentor and inspire students pursuing tech careers.
