Professional Summary

I am a Backend Developer and Computer Engineering finalist awaiting final results at the University of Benin (Class of 2026) with a passion for building inclusive technology. As a Women Techsters Fellow, I specialize in developing server-side applications and APIs while actively advocating for gender equity in STEM. I am also the Founder of **Unimap+**, a campus commerce and delivery platform providing economic opportunities for students and vendors, featuring an inbuilt navigation map to help new students and visitors find their way around campus and an AI-based recommendation system, currently expanding to UNIBEN and IUO. Beyond coding, I am committed to mentorship, frequently speaking at sessions to inspire other students in their tech journeys.

Technical Skills

Languages: Python, JavaScript
Frameworks: Django, Node.js, Express.js
Databases: PostgreSQL, MySQL
Tools & DevOps: Git, Docker, Kubernetes
Backend Dev: RESTful API Design, Third-Party API Integration

Education

University of Benin (UNIBEN)
B.Eng. Computer Engineering | Completed studies: August 2026 - final results pending.
Coursework: Software Engineering, Digital Logic, Algorithms, Data Communications.

Uniben Demonstration Secondary School (UDSS)
West African Senior School Certificate (WASSCE)

Experience

Software Developer Intern – Edo State ICTA
June 2025 – October 2025

Achievements & Recognition

- **Top 10 Finalist** – UNIBEN DRID Conference Hackathon: Applied backend development skills to build a functional solution under time constraints.
- **Women Techsters Fellow** – Selected from thousands of applicants across Africa for the Tech4Dev backend development fellowship (2025)

Certifications

Digital for All Challenge –2nd Runner-up (State Level), Tech4Dev (2025)

Technical Projects

Unimap+ – Campus and Delivery Platform *(Founder & Backend Developer)*
Technologies: Python, Django, MySQL, RESTful APIs, Google Maps API

- Founded and built a campus-focused food delivery ecosystem connecting students and staff to school eateries at UNIBEN
- Designed backend architecture for order processing, vendor management, and user authentication
- Integrated an inbuilt campus navigation map to help new students and visitors navigate campus
- Currently operating at UNIBEN, with plans to expand to other universities.

Santrack – Sanitation Tracking App *(Backend Team Lead)*
Technologies: Node.js, MySQL, RESTful APIs

Led backend team in designing and building a sanitation monitoring system

for government and citizen use across Nigeria

- Designed and implemented **20+ REST APIs** supporting report submission, case assignment, user authentication, and real-time status tracking.
- Designed relational database schemas for sanitation records and case management workflows

ProjLink – Final Year Project Management System *(Personal Project)*
Technologies: Python, Django, PostgreSQL, HTML, Bootstrap CSS, JavaScript

- Designed and built a web-based platform to streamline final year project submission and supervision
- Developed backend APIs for project submission, supervisor allocation, and progress tracking
- Implemented relational database design to manage project records and supervision workflows
- Built scalable architecture designed for faculty-wide deployment

Weather-Based Transport Ticket Pricing System *(Backend Project)*
Technologies: Node.js, MySQL, Weather API, Google Distance Matrix API

- Built a backend service that dynamically prices transport

tickets using live weather and distance data
- Integrated third-party APIs to fetch real-time weather and route information
- Designed relational database schemas for ticketing and dynamic pricing records

Fellowship & Leadership

Google Women Techmakers Ambassador | First Technovation-led cohort
2026 – Present
Selected for the first Technovation-led cohort of Google Women Techmakers Ambassadors.

Women Techsters Fellow (Class of 2026) | Tech4Dev
2025 – 2026
Intensive backend development fellowship empowering African women in technology.

Tech Advocacy Drive | Tech4Dev × UDSS
March 2026
Delivered career talks, ICT/STEM awareness sessions and mentorship links at UDSS to inspire girls to pursue technology.

Vice President | ACES (Association of Computer Engineering Students), UNIBEN
2023 – 2024
- Oversaw student initiatives and fostered a collaborative technical community
- Organized a school-wide Mental Health Outreach event across multiple faculties
- Led a team to build a custom Mental Health Assessment App integrating tech into social advocacy
- Organised “Let’s Talk Tech” in 2024, bringing together students and tech enthusiasts to discuss technology-related topics, explore fields including cybersecurity, and discover career opportunities in technology before and after graduation

Speaking Engagements
- Speaker at Women in Tech Global Conference 2026.
- Guest Speaker | JCIN UNIBEN 2026. Delivered a talk titled “From Student to Tech Builder: Turning Ideas into Real Product Solutions Before Graduation”, guiding students on turning ideas into practical technology solutions before graduation.
- Speaker at a virtual session organized by the Association of Computer Engineering Students to mentor and inspire students pursuing tech careers.
